

CALL RECORDING SOFTWARE THAT DOES MORE FOR LESS

You May Be Overpaying for Your Current Call Recording Software—Here's Why

Are you stuck paying for an outdated call recording system with high maintenance rates? When upgrading to Encore's Call Recording solution with DVSA Analytics, businesses save big with Quality Management on top of call recording.

How Can Encore Help Businesses Accomplish More While Spending Less?

DVS costs 30% less than our leading competitors.

- Encore Call Recording & QM costs less than a standard call recording system from our competition.
- Encore Call Recording, QM, & Transcription Analytics cost less than a competitor's call recording solution & QM system combined.
- Often a new Encore system costs less than annual maintenance on a competitor system.

In other words, a company can do more with Encore while spending less than it would with competing solutions.

Encore Offers Everything You Need & Nothing You Don't

If all you're doing is call recording, why should you look for a more affordable platform? Call recording is a commodity. So, why pay more for it?

DVSA Analytics' Encore solution provides cost-effective and reliable call recording, offering everything you need without unnecessary features. Businesses can upgrade at any time to add QM & Transcription Analytics to their existing system.

Identifying Cost Savings with Encore's Call Recording

DVS analyzes the cost savings your business gets when switching to our system in these ways:

- Comparing the annual costs of a SaaS Cloud service, which requires less capital outlay.
- Comparing the yearly subscription service costs to your previous service.
- Determining the cost savings for the initial purchase of the new system.

Either way, you'll be paying far less with DVS.
